Request to the Nagoya City

Dear Takashi Kawamura, Mayor of Nagoya City

- 1) Please secure long-term and stable water source including use of raw water transmission from a clean source like the Kiso River, advanced treat sewage water and underground water, because we need clean water source to revitalize the Horikawa River.
- 2) Please carry out early and regular cleaning by Nagoya City to keep the beauty of the precious waterside space. Because citizens are unable to clean up the garbage on the water surface and the riverbank completely.
- 3) Please implement the edification activities to stop and prevent littering, and aggressively address environmental education at elementary and junior high school. There is unending pollution of the Horikawa River with abounded waste and littering.
- 4) Please support the civil activities including the cleanup efforts and the edification events for revitalizing the Horikawa River by citizen volunteers.

Sincerely,

Takahiro Umemoto, The chairperson of the executive committee for the Horikawa Sen-nin Chosatai

Hiroshi Hattori, The director of the secretariat of the executive committee for Horikawa Sen-nin Chosatai
